

# Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## WS Verbatim Multi-Index Portfolio 3 Fund ('the Fund') Class A Accumulation

ISIN: GB00B4W2H776, a sub fund of WS Verbatim Multi-Index Funds. Waystone Management (UK) Limited is the Authorised Corporate Director of the Company.

### Objectives and investment policy

Objective:

The Fund will use a broadly defensive investment strategy with the aim of achieving capital growth over the medium to longer term.

Investment policy:

The Fund's portfolio will gain exposure to the underlying assets via a diversified range of passive open ended funds, exchange traded funds and real-estate investment trusts. The underlying asset mix is generally fixed interest but exposure to UK and global equities may be included.

The underlying asset mix of the Fund will follow an asset allocation model, provided by an external risk rating agency, such that, on a risk scale between 1 and 10, where 1 is defined as likely to be "lowest risk" and 10 is defined as likely to be "highest risk", the Fund's risk level is expected to be level 3 meaning low risk.

The allocation of the Fund's assets between eligible asset classes will be managed by the Investment Adviser to achieve the investment objective of the Fund, whilst remaining at its pre-determined risk level. The Fund is able to invest in transferable securities (including exchange traded notes), bonds, collective investment schemes, warrants, money market instruments, cash, deposits (including certificates of deposit) and derivative instruments.

Through its investments, the portfolio will be exposed to a diversified range of asset classes, underlying currencies, geographical spread and may hold funds managed by a variety of fund management groups.

It is the ACD's intention that derivatives and forward transactions will only be used for Efficient Portfolio Management (EPM).

Other information:

Any income the Fund generates in respect of your investment is rolled up and included in the value of your shares.

Recommendation: Investment in the Fund should be regarded as long-term, which is upwards of three to five years.

You can buy or sell shares in the Fund on each UK business day.

For full investment objectives and policy information please refer to the prospectus.

### Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

This Fund is ranked at 3 because funds of this type have experienced low to medium rises and falls in value in the past. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. Please note the Fund's risk category may change in the future. The indicator does not take into account the following risks of investing in this Fund:

Where the Fund makes investments in assets that are not denominated in GBP, changes in the exchange rates will affect the value of your investment.

The Fund invests in fixed interest securities, there is a risk that issuers of the Bonds may not be able to repay the money they have borrowed or the interest that is due.

As an investor of another collective investment scheme, the Fund will bear, along with the other investors, its portion of the expenses of the other collective investment scheme, including management, performance and/or other fees. These fees will be in addition to the management fees and other expenses which a Fund bears directly with its own operations.

The Fund may invest in Exchange Traded Funds which represent a basket of securities that are traded on an exchange and may not necessarily trade at the net asset value of their underlying holdings. As a result, they may trade at a price that is above or below the value of the underlying portfolio.

The Fund is classed as a NURS and can have wider investment and borrowing powers than a UCITS scheme with higher investment limits in various areas. It can also invest to a greater extent in areas such as property and unregulated schemes and have the option to borrow on a permanent basis. Such additional powers can increase potential reward, but may also increase risk.

There is a risk of a loss to the Fund due to system failures, inadequate controls and human error.

For further risk information please see the Risk Factors section of the prospectus.
