

# Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## WS Verbatim Portfolio 6 Fund ('the Fund') Class B Accumulation Shares

ISIN: GB00B3MPJG29, a sub fund of WS Verbatim Funds. Waystone Management (UK) Limited is the Authorised Corporate Director of the Company.

### Objectives and investment policy

Objective:

The Fund will use a broadly balanced investment strategy with the aim of achieving capital growth over the medium to longer term.

Investment policy:

The Fund will seek to achieve its objective through investment in collective investment schemes (regulated and unregulated) as well as directly held transferable securities, (including exchange traded notes), derivatives, cash, deposits, warrants and (including certificates of deposit), warrants and money market instruments. Investment may be made globally but foreign currency exposure through non UK investments may be hedged back into Sterling.

The Fund may also gain exposure (directly and indirectly) to alternatives, including but not limited to, property, commodities, hedge funds, private equity, infrastructure and loans, through investment in collective investment schemes and transferable securities.

Use may also be made of stock lending, borrowing, cash holdings and derivatives. It is intended that derivatives will be used for investment purposes as well as for efficient portfolio management but the ACD does not anticipate that such use of derivatives will have any significant adverse effect on the risk profile of the Fund.

Other information:

Any income the Fund generates in respect of your investment is rolled up and included in the value of your shares.

Recommendation: Investment in the Fund should be regarded as long-term, which is upwards of three to five years.

You can buy or sell shares in the Fund on each UK business day.

For full investment objectives and policy information please refer to the prospectus.

### Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,  
lower risk

Typically higher rewards,  
higher risk

This Fund is ranked at 4 because funds of this type have experienced average rises and falls in value in the past.

Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. Please note the Fund's risk category may change in the future. The indicator does not take into account the following risks of investing in this Fund:

Where the Fund makes investments in assets that are not denominated in GBP, changes in the exchange rates will affect the value of your investment.

The Fund could lose money if an entity with which it interacts become unwilling or unable to meet its obligations to the Fund.

As an investor of another collective investment scheme, the Fund will bear, along with the other investors, its portion of the expenses of the other collective investment scheme, including management, performance and/or other fees. These fees will be in addition to the management fees and other expenses which a Fund bears directly with its own operations.

The Fund may invest in Exchange Traded Funds which represent a basket of securities that are traded on an exchange and may not necessarily trade at the net asset value of their underlying holdings. As a result, they may trade at a price that is above or below the value of the underlying portfolio.

Where the Fund invests in derivatives and forward transactions in the pursuit of the Fund's objective, the net asset value of the Fund may at times be volatile (in the absence of compensating investment techniques). However, it is the ACD's intention that the Fund will not have volatility over and above the general market volatility of the markets of the underlying investments and that the use of derivatives and forward transactions in the pursuit of the objective will not cause the risk profile to change.

The Fund is classed as a NURS and can have wider investment and borrowing powers than a UCITS scheme with higher investment limits in various areas. It can also invest to a greater extent in areas such as property and unregulated schemes and have the option to borrow on a permanent basis. Such additional powers can increase potential reward, but may also increase risk.

For further risk information please see the Risk Factors section of the prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
